GREENTECH INTEGRATED SOLUTIONS LTD

Expertise that connects projects, data and people.

UK architectural and engineering experience, Nigerian oil and gas insight, and practical digital expertise - brought together across four GIS business streams.

01 Digital engineering & information

ISO 19650-aligned delivery, BIM coordination, CDE workflows, COBie, geospatial data, automation and asset handover.

02 RideSafe | Secure mobility

Chauffeur-driven travel for business, private and project needs. Availability is confirmed by route, class and operational capability.

03 Energy & resources

Partner-led project support, technical logistics, procurement, industrial services and digital asset information.

04 Agri & food systems

Developing partnerships in production, agri-tech, processing, storage, distribution and market access.

Why engage GIS?

Leadership shaped by leading UK firms, major infrastructure programmes and Nigerian oil and gas operations, supported by international professional development.

LEADERSHIP BEHIND THE CAPABILITY

UK experience. Nigerian sector insight.

Anderson Onyeka

Founder & CEO
Director of Information Management & Digital Engineering

25 years of UK experience with leading architectural, engineering and construction firms, including Arup, Foster and Partners, Atkins, Aedas and Laing O'Rourke. His work spans HS2, Crossrail, Thames Tideway, data centres and defence/nuclear infrastructure. He leads ISO 19650-aligned information management, BIM, CDE workflows and asset handover. Anderson is also CEO of Digital Transformation Technology, London.

Imperial College London: Digital Transformation Game-Changing Technologies Certificate.
BSc Architecture | BRE Academy BIM Level 2.

Harris Onyeka

Co-Founder & Technical Director

Extensive Nigerian oil and gas experience built through more than two decades with Fugro, progressing from digital mapping and surveying to project management and tender coordination. His work included geospatial data for Shell-related operations. A former Chief Strategy Officer at Geode Datafuge, he combines technical delivery with Python/SQL automation, Power BI, multidisciplinary bids and commercial strategy.

International training: France and the Netherlands.
BSc (Hons) Surveying, Geodesy & Photogrammetry.

Leadership experience includes previous employers and is not presented as GIS corporate project history.
